3

Here is your opportunity for one-floor living in the beautiful and amenity-rich community of Winding River! This brick home, nestled in at the end of the cul-de-sac boasts a lovely fenced backyard, fresh paint, a Generac whole-house generator, new roof in 2025, reverse osmosis system under the kitchen sink, AND a three-car garage. The spacious living room opens to a fantastic sun-room that overlooks the masterfully landscaped backyard. The generously sized master suite will fit any traditional bedroom furniture. Through the newly-installed barn door, a set of his and hers closets line the hallway to the large, luxurious master bathroom. There is a dedicated office toward the front of the home so no bedroom needs to serve double-duty. The split floor plan means that guests will have their own space on the other side of the home. There is plenty of storage in this home with a large pantry and true laundry room in addition to the coat and linen closets. In addition to that, there is a set of pull-down stairs enabling access to a large storage area above the garage. The three-car garage allows for plenty of workspace and is even outfitted with its own mini-split system to heat and cool as necessary. Imagine spending your time enjoying the professionally hardscaped and landscaped backyard and patio complete with firepit. Custom window treatments allow light to enter, while also maintaining privacy. Winding River is one of the most amenity rich and active communities in this area! With its large clubhouse, fitness room, exercise classes, walking trails, newly renovated tennis/pickleball courts, river house with day docks, boat ramp and kayak launch, and private beach house with parking at Holden Beach, there is always something to do! There are many organized groups and social activities here, so there is truly something for everyone.
